

ENTRÉE

NON-IONIC ACTIVATOR-ENHANCER

An adjuvant that increases the wetting and spreading properties of spray solutions and enhances the activity of various agro-chemicals.

WARNINGS

- Causes skin irritation.
- May cause allergic skin reaction.

RE-ENTRY INTERVAL: Do not enter treated area, until spray deposit has dried unless wearing protective clothing.

DISCLAIMER

Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label as well as by the method, time, and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS

- Observe warnings that apply to the product with which it is to be used.
- Wear chemical goggles or face shield with safety glasses and suitable protective clothing. For operations where prolonged or repeated skin contact may occur, impervious gloves should be worn.
- Rinse tank, lines, and nozzles, immediately after use, with water.
- Prevent contamination of food, drinking water and eating utensils.
- **ENTRÉE** should be used with agro-chemicals that recommend the use of an adjuvant and should not be used with products that do not require the use of an additional adjuvant.
- Prevent drift unto other crop, grazing, rivers, dams, and areas not under treatment.

Rinse empty container three times with a volume of water equal to a minimum of 30 % of that of the container and add rinsings to the contents of the spray tank before disposing of the container. Destroy the empty container by perforation and dispose of it in a safe manner. Do not use for any other purpose. The triple-rinsed container may be sent to an approved recycling facility for processing.

**READ THE LABEL AND ATTACHED PACKAGED LEAFLET BEFORE USE
KEEP OUT OF REACH OF CHILDREN AND ANIMALS**

NON-IONIC ACTIVATOR-ENHANCER

An adjuvant that increases the wetting and spreading properties of spray solutions and enhances the activity of various agro-chemicals.

ACTIVE INGREDIENT: Vegetable Oil (Canola & Soyabean)..... 819 g/L

ADJUVANTAGE®

HAZARD STATEMENTS

- Causes skin irritation.
- May cause allergic skin reaction.

PRECAUTIONARY STATEMENTS

- Avoid breathing vapor or mist.
- Wash thoroughly after handling.
- Wear protective gloves.
- If medical advice is needed, have product container or label at hand.

RELEVANT SUBSTANCES

Hazardous Component - Chemical Name	CAS NO.	Weight (%)	GHS Classification
This product has been tested as a whole to determine its hazard	-	90-100	Hazardous

FIRST AID

May cause irritation to mucous membranes and respiratory tract.

Treatment should be symptomatic and supportive.

IF ON SKIN: Wash off immediately with plenty of water for at least 15 minutes. Take off contaminated clothing and wash before reuse. Call a physician or poison control center.

IF IN EYES: Immediately flush with plenty of water. After initial flushing, remove any contact lenses and hold eyelids apart and flush with a steady, gentle stream of water. Continue flushing for at least 15 minutes.

INGESTION: DO NOT INDUCE VOMITING. If vomiting occurs naturally, reduce the risk of aspiration by leaning their body forward. Clean mouth with water and afterwards drink plenty of water. Never give anything by mouth to an unconscious person. Get medical attention.

INHALATION: Remove to fresh air. If breathing has stopped, apply artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

USE RESTRICTIONS

Test the mixture on a small scale before applying it on a large scale.

GENERAL INFORMATION

ENTRÉE can be used with both water and oil-soluble pesticides that recommend the use of an adjuvant.

ENTRÉE reduces the surface tension of spray droplets and in this way increases retention and the amount of product that is actively available. It may also enhance the absorption of systemic agro-chemicals.

ENTRÉE is a vegetable oil and emulsifier (wetter, spreader & penetrant) and can be used with products that recommend the use of such an adjuvant.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED

Ground application: **ENTRÉE** can be used with any correctly calibrated spray equipment as recommended on the pesticide label.

Aerial application: Take all necessary precautions associated with aerial spraying of herbicides especially regarding control of drift. Follow the label instructions of the agro-chemical being used with **ENTRÉE**. If in any doubt, consult with the supplier and crop sprayer.

Application rate:

AGRO-CHEMICAL	DOSAGE
Post-emergence herbicides	150 - 750 ml/ha (Use higher rates under environmental stress conditions.)

Half fill the spray tank with clean water.

Add the required amount of agro-chemical and **ENTRÉE** and then the remainder of the water while stirring.

In the event of tank mixes, strictly adhere to all the recommendations of the tank-mix components.

Prepared mixture must not be left in the spray tank for any length of time.
