WHAT IS ENTRÉE?

A unique, blended, performance-based spray adjuvant that improves initial adhering and spreading of agrichemical spray on plant surface, and also increases movement into plant tissue.

ENTRÉE ADVANTAGES

- Increases initial amount of spray-mixture adhering to plant surface when sprayed.
- Increases retention of agricultural chemical on plant surface.
- Improves spreading (coverage) of spray-mixture on plant surface.
- Improves spreading on surface of various plants (grass and broad-leaf types).
- Increases and accelerates movement of agri-chemical through waxy and hairy cuticles.
- Designed to be used with oil and water-based agri-chemicals.
- Designed to be used in tank mixes containing both oil and water-based agri-chemicals.
- Moves oil and water-based agri-chemicals into plant tissue via oil and water-soluble areas of the leaf respectively.
- Allows agri-chemical translocation during periods when stomata are closed (e.g., heat and windy conditions).
- Does not dry rapidly during high climatic temperatures.

ADDITIONAL ENTRÉE BENEFITS

- Not affected by pH of water.
- Not hard on crops under stress.
- Reduces crystallization of agri-chemicals applied.
- Extends absorption time.
- Crop friendly product.
- Easy storage.

WHEN TO USE ENTRÉE

- Post emergence herbicides.
- Translaminar products.
- Systemic products.
- Hormonal products.

BRINGING QUALITY USA FORMULATED PRODUCTS TO THE FARMING COMMUNITY FOR OVER 80 YEARS
