

# Hot Pepper | Habanero

## Habanero Open-Pollinated Range

**Habanero Red**

**| Habanero Yellow |**

**Habanero Orange**

Habanero Has a tapered Lantern-shaped fruit with a wrinkled light-green flesh, that ripens to its unique colour. This open-pollinated range is ideal for the home and fresh market grower looking for something hotter than normal. Slow germination is a norm and warm moist growing conditions is preferred.

Red is a hotter strain, with slight larger fruit sizes than the orange and yellow counterparts.

New hybrid lines are available with better vigour and germination rates for the more serious growers out there.

### Specifications Of Range:

Cultivation:	Open field   Under Protection
Type:	Fresh   Box   Pre-pack   Export   Drying
