

Rolet

Rolet | Gem / Squash

Rolet Gem Squash (*Cucurbita pepo*) is a well-known South African favourite. The gem squash has a creamy, pale orange flesh with a lovely texture. Of all the squashes this is probably the easiest and most reliable one there is. A reliable and heavy cropper, each plant can produce fifteen or more fruits grown on trailing vines.

Specifications:

Cultivation:	Open field
Type:	Loose Bags Pre-pack
Days to maturity:	55 – 65 days
Fruit shape:	Round
Plantstand:	12 – 15 000 p/ha
